DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: In paragraph 0011, line 11, "knives" should be --knives--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Puncochar, 5,343,682.

Puncochar discloses a hold down clip (embodiment of Figures 1-3) including:

- a frame with a first leg (7 and 8) and a second leg (23 and 24)
 - an enlarged wear plate (4) on the second leg that holds the sickle bar against the knife guard
-
- an adjustment assembly (25 and 3) extending between the first and second legs

The first leg forms a mounting assembly for mounting to a support bar (Fig. 1). The second leg is forms the hold down assembly.

In regards to claim 2, the adjustment assembly is a bolt (25) and a nut (3).

Art Unit: 3671

In regards to claim 3, the raised web portion is considered to be the raised portion around the head of bolt (25.

In regards to claim 4, the raised web portion is considered to have portion 29, which receives the rear of the knives as show in Figure 3.

In regards to claims 5 and 6, the first leg has a guide surface 28 that contacts the sickle bar.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 8-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over the embodiment of Figures 1-3 in Puncochar in view of embodiment of Figures 6-9 in Puncochar.

Figures 1-3 of Puncochar discloses the claimed invention as described in detail above.

However, these Figures do not show a reinforcing rib on the second leg.

Figures 6-9 of Puncochar, discloses a similar hold down clip with a second leg. However, this embodiment includes a reinforcing rib as shown in Figure 6.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the second leg in the embodiment of Figure 1-3 with a reinforcing rib as shown in the embodiment of Figure 6-9, since it is well known in the art that reinforcing ribs provided strength and decrease breakage.

Art Unit: 3671

In regards claims 9-13, the limitations in these claims are described in detail above.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
